### Legal Aid Camp

1. Dates – 22.01.2022 (SATURDAY)
2. Location – VILLAGE BADWAI BHOPAL

**Organised by**

**Faculty of Law**

**RKDF University, Gandhi nagar, Bhopal**

### EVENT SUMMARY :

The Faculty of Law, RKDF University Bhopal organised a legal aid-cum-assistance camp at Badwai village, near Bhopal, on 22.01.22 Saturday, to spread awareness among masses about the rights of vulnerable sections of society more specifically regarding getting free legal aid. This camp was an initiative to provide free legal aid to the locals as well.

The camp was conducted for awakening the residents of the village about various laws and providing them free legal aid. The department after taking approval from the University management appointed 6 faculty members and divided 45 students in 4 groups in which the faculty coordinator was in lead. These groups visited the village and inquired the local residents about issues which they were facing in the locality, and also guided them about free legal aid and made them aware about the laws regarding the issues faced by them. Local residents came forward for taking advice regarding their legal issues.

The residents were made aware about the various schemes on juveniles, the Protection of Children from Sexual Offences Act, 2012, compensation scheme for cases of acid attack and rape victims. They were also detailed about rights of senior citizens. In the camp, dean and 6 faculty members along with 45 students were present.

Students being a part of this programme were exposed to practical knowledge which is a must for budding lawyers. This platform gave them an opportunity to boost their confidence level.

A REPORT ON  
INTERNATIONAL WOMEN'S DAY CELEBRATION

Dated: 08/03/22

Time: 12:00 p.m -2:30 p.m

Venue: University Seminar Hall

RKDF UNIVERSITY has celebrated the International Women's Day on 08th March 2022, under the guidance of Hon'ble V.C. Dr. S.K.Sohani sir, Director General Management Dr. B.N.Singh sir, Registrar Dr. N.K.Lariya sir and Chairperson WGC Dr.Ashvini Joshi in which more than 280 students and teaching and non teaching staff participated with enthusiasms. Ms Poonam Shrotri ( Motivational Speaker, Life Coach, TEDx Speaker, Youth Icon, Social Activist, Campaigner, Entrepreneur) grace the event as Chief Guest. This is a commemoration event under the theme #BreakTheBias.

As per Indian tradition the event started by the floral welcome of all the dignitaries present on the dais and off the dais and by lighting the lamp in front of Maa Saraswati which was followed by a Saraswati Vandana performed by few girls of Agriculture dept., followed by Vande Mataram. After that wonderful classical dance was performed . Our hon'ble Vice Chancellor and Registrar sir had given the speech based on the theme of gender equity, which was really marvelous . Then after, a very thoughtful drama was presented by the students of Law Dept. It was wonderfully performed and dressing was planned according to the theme. The

## 2. INTRODUCTION

### 2.1 GENERAL

Omkareshwar Project is a multipurpose project with an installed capacity of 520 MW with designed annual energy generation of 1166 million units in initial stage and annual irrigation of 2.83 Lac. Ha on a culturable Command Area (CCA) of 1.47 Lac. Ha. Total Catchment Area at the Dam site is 64880 sq.km. Generation of power at Omkareshwar Project is directly related to the regulated release of water from Indira Sagar Project, hence it is one of the beneficiary project of Indira Sagar Project. Project has been commissioned in November 2007.

### 2.2 Other Details

Location	Khandwa District of Madhya Pradesh
Approach	77 Kms. from Indore.
Capacity	520 MW (8 x 65 MW)
Design Energy	1166 MUs (90% dependable year.)
Project Cost	Rs.2224.74 Crore (Nov. 2002 price level)
Date of Commercial Operation (COD)	2007

### 2.3 Technical Features

- 49m long Concrete Gravity Dam, 53m high from the deepest foundation level.
- 171.5m long H.R.C. and 145m long T.R.C.
- A surface Power House to accommodate 8 units of 65 MW each.

### 7.0 Dam for Irrigation and Overflow flood

A dam is a structure built across a stream or river to hold water back. Dams can be used to store water, control flooding, and generate electricity. The dam was constructed between 2003 and 2007 with the purpose of providing water for irrigation of 132,500 ha (327,000 acres) On the right hand side of this canal, a 162.95 KM long right bank canal construction work is in progress. On the left hand side of common water carrier 64.11 KM long left bank canal is also under construction. From Right Bank Canal, 125 KM long, lift Canal is also under construction. Complete Canal System of the Project shall create irrigate potential of 1,46,800 Ha of Khargone, Dhar & Khandwa district. Irrigation potential of 52950 Ha has been created by Dec/2012. 2155 Ha land has been irrigated up to 1/2012.

### 7.0 SPILLWAY

A **spillway** is a structure used to provide the controlled release of water from a dam or levee downstream, typically into the riverbed of the dammed river itself. In the United Kingdom, they may be known as **overflow channels**. Spillways ensure that water does not damage parts of the structure not designed to convey water.

Ogee spillway, as the name says, **represents the shape of the downstream face of the weir**. It is an improved form of a straight drop spillway. In this case, the downstream face of the weir is constructed corresponding to the shape of lower nappe of freely falling water jet which is in ogee shape

### 8. Radial Gate

Radial gates consist of the following four parts:

1. The gate leaf assembly, including the curved skin plate, cross bracing or struts, supporting beams and girders, and rubber seals.
2. Arm assembly, including the arm columns, bracing, and hub.
3. Trunnion assembly, including a pin, busing, thrust washers, lubrication provisions, and yoke.
4. Trunnion support assembly, including the trunnion beam or anchor block and anchorage system.
5. Wire rope hoist system.

### 9.0 GALLERIES

Function of galleries are as follows

- Galleries have to be left in the gravity dams during their construction.
- The size of the galleries depends upon the purpose, they have to perform.
- The galleries may be aligned both along the axis and across the axis of the dam.
- They are provided at all the levels of the dam.
- All the galleries are given some longitudinal slope and small channels along both the edges of the galleries are formed.
- Seeping water through the dam section is collected by the channels running along the galleries.
- Since channels have longitudinal slope, the collected water in channels keeps on flowing automatically and is collect at some central place from where it is discharged into the D/S side of the dam.

### 11.0 ADVANTAGES & DISADVANTAGES OF CONCRETE DAMS

**There are some advantages of concrete dams described as following:**

1. The maintenance cost of gravity dams is very small.
2. Spill ways can be installed in the dam itself and no separate site for them is required.
3. They can be constructed for very large heights.
4. Ice and other outer effects do not affect the stability of the dam.
5. Water is not lost by seepage.
6. Outlet sluices may be installed in the dam.
7. At valleys where side slopes are very steep, only this dam is found as the most suitable choice.
8. This dam gives pre-warning before failure. If timely measures are taken, the dam may even be made safe.

#### DISADVANTAGES OF GRAVITY DAMS

**There are some disadvantages of concrete dams as below:**

1. They are very costly.
2. They require very skilled labor for construction.
3. They have to be continuously cured during construction.
4. Large calculation work is involved in their design.
5. They require a solid hard foundation.
6. The height of the dam cannot be increased later.

## INDUSTRIAL VISIT

To

**NHDC HYDRO POWER PLANT OMKARESHWAR**

### 12. CONCLUSION:

The Industrial Visit to the NHDC HYDRO POWER PLANT OMKARESHWAR was highly successful. We received insight of the whole plant right from the raw material (water) procurement, processing, generation , transmission & control room of electricity, various parts of dam such as spillway, gate and galleries and Canal serving multi-purpose of the Dam. The whole process was explained in detail by their representative with detailed description about each equipment with their specifications. A doubt solving session with the Control Room Incharge cleared all our queries. This kind of industrial exposure helped us to absorb the theoretical aspects of Power Plant and Power Electronics Engineering more efficiently. This industrial exposure to dam maintains and operational function during the monsoon and regular period of the reservoir,

## **ABOUT THE PROGRAM**

**Department of Computer Science Engineering & Computer Applications of RKDF University, Bhopal** is organizing a three day Workshop in “**Cryptography and Cyber Security**” from **April 28<sup>th</sup> to April 30<sup>th</sup>** under the flag ship of **RKDF University**, which is one of the fastest growing Universities in Central India.

Cyber Security is a specialized field in Information Technology (IT) which is regarded as a sub stream in Computer Science. Cyber Security courses aims to equip students with the knowledge and skills required to defend the computer operating systems, networks and data from cyber-attacks.

Cyber Security as a profession is evolving over the years, reason being the increasing rate of cybercrimes. Any industry that transacts online or carries sensitive data is in need of a Cyber Security professional to safeguard its date from such delinquents. Cyberspace being a common platform which is accessed anyone from every corner of the world, the scope of cyber security is equally spread across the globe.

Cryptography is an indispensable tool for protecting information in computer systems. In this course you will learn the inner workings of cryptographic systems and how to correctly use them in real-world applications.

## **PROGRAM AIM AND SCOPE**

With increase in usage of the Internet, there has been an exponential increase in Cyber-attacks. Cybercriminals use new and clever tricks to bypass security solutions. Cryptography & Cyber Security are integral part of the organization's security services. This Workshop aims to stimulate the intensity and need of Cryptography & Cyber Security among the teachers, students & research scholar from different parts of the country. The Objective of the program is to provide awareness on cyber security & Cryptography, to familiarize everyone with the various challenges in these fields especially in its emerging areas, and to promote a solution-based research approach in various aspects of cryptography & cyber security by giving hands-on training. The motivation is to promote Computer Security, Cryptography, Digital Money, Secure Protocols and Security Techniques. This Workshop is designed to give Techniques and hand on Experience on IT Systems Security & Infrastructure, Monitoring Potential Threats and Attacks and implementing Security solutions.

It would be great platform for faculty, students and research scholars to upgrade their knowledge in the recent emerging technology of area of Cryptography & Cyber Security to strengthen the regulatory framework and create a secure cyberspace ecosystem.

## PROGRAM OBJECTIVES

**By the end of the workshop, the students will be able to learn**

1. To understand basics of Cryptography and Network Security.
2. To be able to secure a message over insecure channel by various means.
3. To learn Firewall Characteristics, Types of Firewalls, Firewall Location and Configurations.
4. To understand the concept of Public key cryptography.
5. To learn Implement Cyber security Best Practices and Risk Management

## PROGRAM OUTCOMES

- Illustrate various Public key cryptographic techniques
- Summarize the intrusion detection and its solutions to overcome the attacks
- Basic concepts of system level security
- Analyze and evaluate the cyber security needs of an organization
- Implement cyber security solutions and use of cyber security tools.
- Design, develop, test and evaluate secure software.

## National Workshop in Cryptography and Cyber Security -2022 Organized by RKDF University, Bhopal

**Technical Session 1** was initiated by Keynote speaker Ms. Shital Gupta, Professor at School of Research and Technology, People's University Bhopal. Her topic of the day was “Digital Watermarking and Data Hiding” Digital image watermarking is a technique in which watermark data is embedded into a multimedia product and, later, is extracted from or detected in the watermarked product. Digital watermarking technology is being adopted to ensure and facilitate data authentication, security and copyright protection of digital media. It is considered as the most important technology in today's world, to prevent illegal copying of data. Digital watermarking can be applied to audio, video, text or images.

**Technical Session 2** was conducted by Cyber Security Expert and one of the Best Ethical hackers in the town with a huge knowledge base in a field of cyber security, Mr. Mahesh Shrivastava who is associated with All India IT Association, Bhopal. He demonstrated various aspects of Hacking and data theft through live demo by a team of cyber experts. He explained what Ethical hacking actually means. Ethical hacking is a process of detecting vulnerabilities in an application, system, or organization's infrastructure that an attacker can use to exploit an individual or organization. They use this process to prevent cyber-attacks and security breaches by lawfully hacking into the systems and looking for weak points.

Organized by  
**RKDF University, Bhopal**

**Technical Session 3** (Day 2) was taken by Dr. Rajesh kumar Sharma, Associate Professor, RKDF University, Bhopal, who discussed about Internet of Things and Blockchain Technology. Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system. A Blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the Blockchain. He also shared with the participants various safety measures that can be taken for the safety of data & network and how network breaching can be avoided.

Dr. Rajesh Sharma honored with a memento as token of gratitude.

**Technical Session 4** (Day 2) was initiated by Dr. Komal Tahiliani who is a Professor at SISTech, Gandhinagar Bhopal. Her topic of Discussion was “Cyber Threats & Cryptography”. Cyber threats are a big deal. Cyber-attacks can cause electrical blackouts, failure of military equipment, and breaches of national security secrets. They can result in the theft of valuable, sensitive data like medical records. They can disrupt phone and computer networks or paralyze systems, making data unavailable. During her session she demonstrated how Encryption and Decryption can be carried out, through live demo using online tools.
